# LeTriple<sup>®</sup> Wheels

LeTriple Wheels, a chair that can truly get you further. LeTriple Wheels is a chair with a very different look, but of course that's not the only thing different! LeTriple Wheels unites contemporary styling with a big chunk of functionality. Should your degree of mobility be deteriorating, or if you're simply having a bad day, a standard 'pedal' chair may not be sufficient. Then the LeTriple Wheels, uniting shifting and wheelchair functions into an all-in and comfortable chair, is the chair for you.

## FLEXIBLE MOBILITY

LeTriple Wheels is very light to move and can be both shifted and rolled. The sprung rear wheels of LeTriple Wheels ensure that indoor obstacles such as bumps can be easily and safely traversed. The parking brake is easy to use and stylishly concealed in the wheel. Moreover, the large wheels ensure that even in a small space you can still manoeuvre with excellent flexibility.

## EVERYTHING IN REACH

LeTriple Wheels is a chair you can use throughout the day, whether you're eating at the table, working at the computer or want to grab something from a kitchen cupboard. Thanks to the additional electric high-low reach, it's all possible with LeTriple Wheels. Just like with a 'pedal' chair, it is easy and safe to work at a height with LeTriple Wheels. The seat height can be electrically adjusted from 43 cm to no less than 77 cm. And of course we have a footrest that moves up with the chair. The chair can be effortlessly lifted high, while its stable base will ensure that the chair is always firmly grounded.

## SETTINGS

Besides all the functional solutions it provides, LeTriple Wheels is also fully adjustable. Seat width, seat depth and armrests can all be easily set. Moreover, thanks to its modular design it can be completely adjusted to your individual requirements and a variety of functional options can be added.
