

LE TRIPLE

YOUR HELPING HAND

SOWECARE

SOWECARE 

the human factor

LeTriple, a 'pedal' chair that will get you further. LeTriple is a 'pedal' chair with a very different look, but of course that's not the only thing that's different. LeTriple unites contemporary styling with a big chunk of functionality. At home the LeTriple is the perfect work and 'pedal' chair. Whether you're busy on the computer, working at a high table, sitting and working at the kitchen table or reaching the top cupboards in the kitchen with ease, it's all so simple with LeTriple.

WE'VE THOUGHT OF EVERYTHING

LeTriple is a well thought-out concept, demonstrated through facets such as the electric up/down setting ranging between 40 cm and 74 cm, which means that even at its highest setting the undercarriage provides complete stability. This means that almost everything is within easy reach, increasing independence. And of course we have a footrest that moves up with the chair. To sum up, we've thought of everything for LeTriple.

SETTINGS

Besides all the functional solutions it provides, LeTriple is also fully adjustable. Seat width, seat depth and armrests can all be easily set. Moreover, thanks to its modular design it can be completely adjusted to your individual requirements and a variety of functional options can be added.

ERGONOMICS

One aspect that makes the chair so special is the undercarriage. The design of the 'pedal' chair's undercarriage is unique, and its M-shape provides a perfect combination of a great deal of movement, stability and great looks. The space under the chair means you can move around efficiently while using a minimum of energy.

electric up-down adjustment:
